

Programming Assignment 5.5

Learn C With Babbo

For this assignment, write a program that will output a statement of the form

I <verb> <adjective> <noun> <adverb>.

For instance, one possible output could be

I adore salty chips tremendously.

For the verb, adjective, noun, and adverb, the user should choose between an enumerated list of words following some prompt. For example, for the noun, you could have as a prompt:

Enter a noun:

- 1) cat
 - 2) dog
 - 3) parrot
 - 4) giraffe
- >

You should use switch statements to select the word, and do the same for the adjective, verb, and adverb. Then, your program should print out the resulting sentence.
