Solutions 2.4

Learn C With Babbo

1. `my_chars` is an array of `char` with length 9

2. `ASCII`

3. (a) 11 (note the implicit null character)

   (b) 5 (note the absence of the null character)

4. In this code, `my_string` has no null character: where it terminates is undefined, and it may print much more than just `Great` but not necessarily.
